OTCQB Welcomes Delta CleanTech To The U.S Market!

Effective January 20, 2022, Delta announced that it has received approval for trading its common shares on the OTCQB Market (the "OTCQB") under the symbol DCTIF. The company's common shares will continue to trade as well on the CSE under the symbol "DELTA" and on the Frankfurt Stock Exchange under the symbol "66C".

Delta continues to work towards a U.S. listing and trading on the OTCQB, this is an important step allowing U.S. investors to participate in investing and accelerating Delta's growth. The OTCQB platform will increase Delta's U.S. shareholder profile facilitating a more diverse group of investors that will participate in global CO₂ capture, mitigation, and carbon credit origination, aggregation, and streaming.

The OTCQB logo consists of the letters "OTC" in black and "QB" in orange, with a small horizontal bar in red, green, and blue between the "C" and "Q". The logo is enclosed in a white circle with a black border.

Jeff Allison, President of Delta comments, "Delta has expanded its business development opportunities with the opening of its new business development office in Houston, TX. The visibility of the OTCQB listing will compliment the commercial expansion and strengthen Delta's business and corporate development in the United States."

Throughout 2022, Delta will continue to host a series of CO₂ Carbon Capture Workshops. Workshops will be held in Abu Dhabi, Calgary, Houston, Glasgow, and Beijing. **Click on the link below to register for our next workshops live from Calgary and Houston!**
