## Delta CleanTech Presents at the 16<sup>th</sup> Carbon Dioxide Utilization Summit!

Delta was pleased to be a lead sponsor of the North American 16<sup>th</sup> Carbon Dioxide Utilization Summit held in Montreal, Canada this past week. Delta's Chief Technology Officer, Dr. Ahmed Aboudheir, presented a commercially available design for CO<sub>2</sub> capture plants that can assist the industry sectors to meet their emissions cleanup targets towards their Net Zero journey. The conference attendees also learned about the latest innovations regarding ways that CO<sub>2</sub> can be utilized as a commercial commodity to make fuels, chemicals and cement injection. Also discussed, were the latest commercial projects, CO<sub>2</sub> storage projects and advances in carbon credit generation.

The conference saw many senior experts in the field present Carbon Dioxide Utilization technologies for use not just in Canada, but all over the world. The focus of the Summit was on sustainability, technological viability and Commercial utilization of CO<sub>2</sub>. Presenters provided ideas on how Canada and other countries can meet their 2030 and 2050 targets of reducing greenhouse gas emissions and meeting Carbon Net Zero targets.
