Carbon Capture Technology Expo in Houston Generates Major Interest in Delta CleanTech

Delta attended the Carbon Capture Expo event in Houston last week and we are pleased to report that the show was very well attended with over 1,500 delegates. The attendees were anxious to hear about the latest CO₂ capture technologies and Delta was in the forefront, with a constant stream of parties interested in finding out more.

Todd Beasley, Delta's Manager of Business Development made a well received presentation titled "Science, Engineering and Art of Carbon Capture". Mr. Beasley commented, "Our message regarding the need for confident, operational, economic, technical and environmental performance was very well received".

Delta President Jeff Allison and the Manager of Business Development, Todd Beasley

Jeff Allison, President of Delta commented further, "The feedback we received from our potential customers was that they are not interested in science experiments. They want proven technology, and Delta delivers!"

Delta could not be more pleased with the response at this high-profile carbon capture event. It has been encouraging to say the least.

Check out the presentation made by Delta's own, Todd Beasley by clicking the link below!
