UAE to Provide a National Clean Energy Strategy Assisted by **Delta CleanTech**

July 8th, 2022

The Emirate of Abu Dhabi is striving to deliver clean, secure and affordable energy, in their response to the global risks of climate change. This is being addressed by the Ministry of Energy & Industry through the reduction of greenhouse gases caused by the production and use of energy. **Delta** provides the technologies and the proven resources that are being utilized in the implementation of this successful strategy.

*Dr. Ahmed Aboudheir, Chief Technology Officer of **Delta CleanTech Inc.***

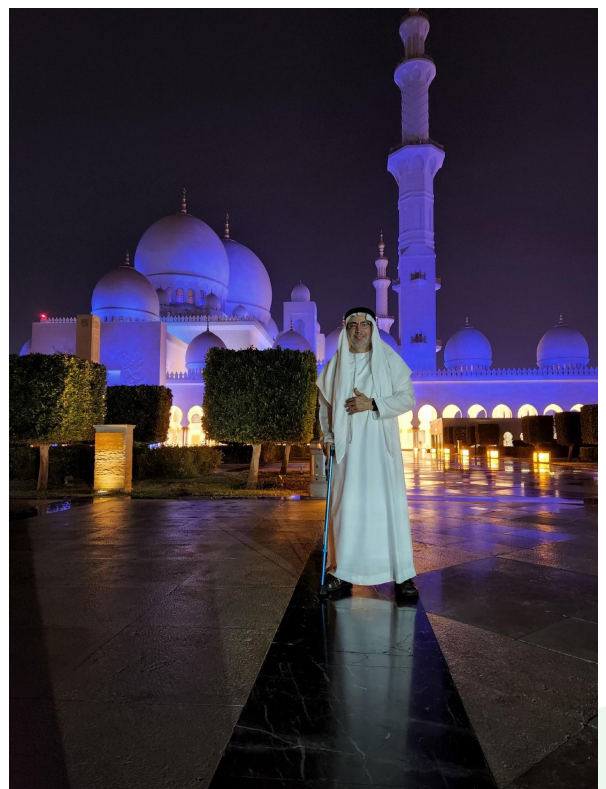

Delta is pleased to announce that they have established a thriving office in the Emirate of Abu Dhabi. This office is led by **Delta's** own Chief Technology Officer, for the past 15-years, Dr. Ahmed Aboudheir.

The office was opened in 2021 and **Delta** is adding qualified engineering and business development personnel to the Abu Dhabi Team located at: Ittihad Complex, Mussafah, Sector M-15, Plot No. 41, P.O. Box 26576, Abu Dhabi, UAE.

Any inquires can be directed to:

Dr. Ahmed Aboudheir
Office : +971 2 304 0250
Mobile : +971 50 411 2945
Email: aaboudheir@deltacleantech.ca

Dr. Aboudheir has great experience in process design, process optimization, and process trouble-shooting in the fields of gas processing, CO₂ capture, chemical reclaiming, industrial liquids reclaiming and reuse, Dr. Aboudheir has over 35 years of experience in the energy industry. He has a B.Sc. & M.Sc. in Chemical Engineering and a Ph.D. in Industrial Systems Engineering as well as being a registered professional engineer with APEGA and APEGS. Dr. Aboudheir has been awarded the Commemorative Medal for the Centennial of Saskatchewan for his significant contributions in hydrogen production, CO₂ capture, and community leadership.

Dr. Aboudheir visits the Sheikh Zayed Grand Mosque in the city of Abu Dhabi.
